THINKTANK

WHAT ARE THE SIGNS AND SYMPTOMS OF TB IN CHILDREN

SEE THE SIGNS

ACT NOW

COUGH

A cough that lasts for any amount of time, but especially one that gets worse.

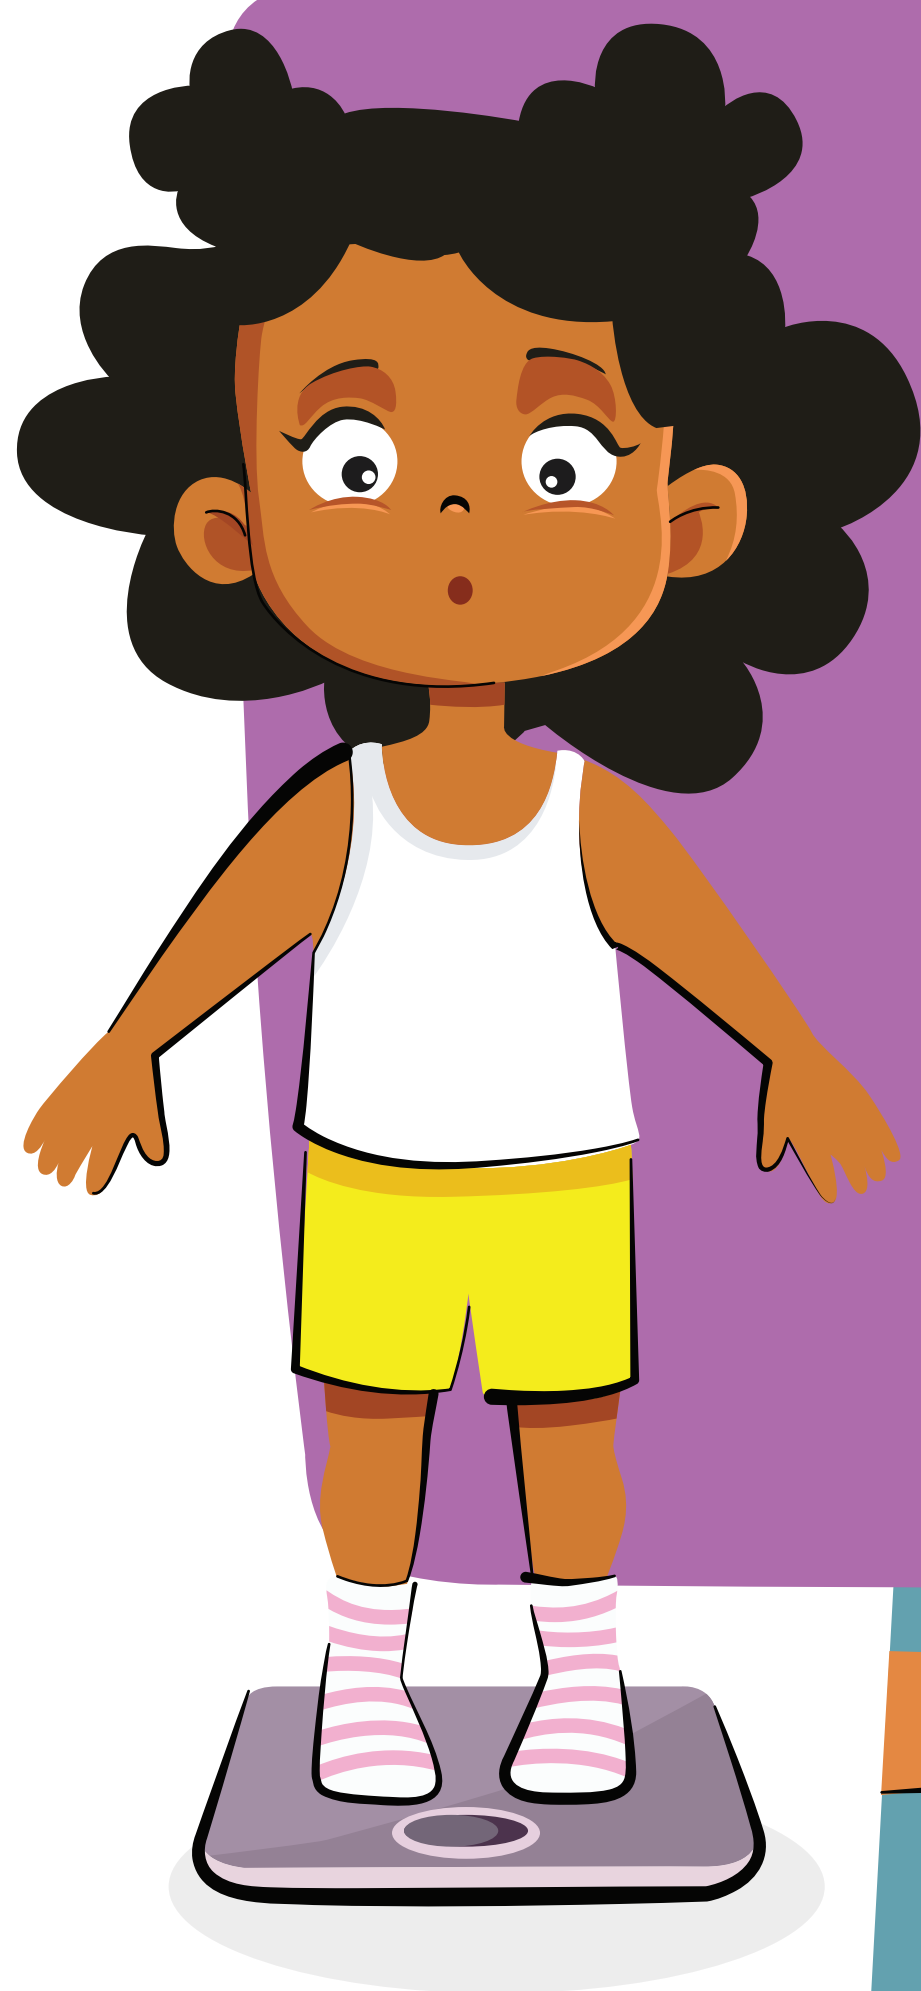

LOSS OF APPETITE

Your child is not hungry anymore or doesn't want to eat.

WEIGHT LOSS

A baby or child isn't growing or gaining weight like they should, even when they get enough food. (Child's clothing does not fit anymore).

TIREDNESS

Your child is less active and playful.

PROLONGED FEVER

Waking up at night, wet from sweating.
